

# SAN DIEGO GREEN BUILDING CONFERENCE AND SEPT 16 2016 EXPO

The San Diego Green Building Council is inviting you to join the network of leaders who help shape our region's sustainability efforts. The 2016 San Diego Green Building Conference and Expo - From Idea to Implementation will focus on the technologies and frameworks that are proven to move the needle on solutions that will make San Diego a leader in exceeding climate goals set by current local and state regulations. Through showcase of best in class products, projects and systems, we aim to catalyze the next wave of partnerships, experts and opportunities for San Diego businesses, residents and visitors. Last year, we expanded our impact by delivering 16 sessions, connecting with international guests from Baja California, and holding San Diego's first ever Living Building Challenge symposium, focused on net zero energy and net zero water opportunities and challenges in the Southern California region.

More speakers and sessions information coming soon!
